# EVOline® Port *Push*

EVOline® Port *Push*

The EVOline Port Push fits virtually flush with the work surface.

By using the Push-To-Open function, the housing is released and appears above the work surface, enabling an easy pull up to connect power and data cables. With a light press of a finger, it retracts with connected leads. Slide dampers ensure a soft closing. The patented rocking cover enables a space-saving cable routing through the desk.

The Port Push modules can be assembled to customer's needs. The interchangeable data and multimedia modules allow greater flexibility, enabling future proof technology with ever changing usage requirements.
