

# EV0line® T-Dock

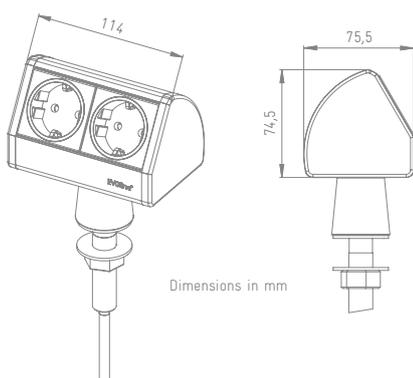

At home in the kitchen.

# EVoline® T-Dock

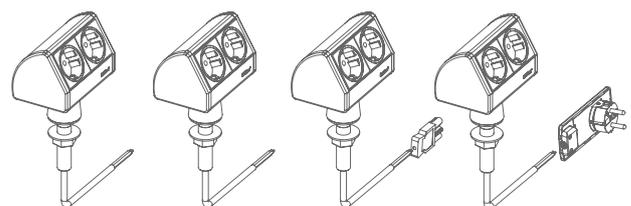

A solid stainless steel pillar raises the EVoline T-Dock up above the work surface. This gives clutter free work place and creates a safe distance between power supply and potentially wet surfaces in the kitchen. In addition, the sockets are also equipped with contact protection.

Features:

The stainless steel pillar through which the power supply cable runs to below the work surface is also a high quality anti-theft device since it is firmly screwed on beneath the surface.
