

magnet-Tube B is a uniquely designed mediaport mounted on the edge of the table top using one or two feet. It doesn't require cutting any holes and is a great and flexible solution not only for dispatcher, service and laboratory workstations, but also for single workplaces.

magnet-Tube B is available in versions from 2 to 9 modules and in a few colour variants: anodized on black, natural or painted in white, red, yellow, green or blue.

Dimensions of different versions (length of housing)

version	2-module	3-module	4-module	5-module	6-module	7-module and more
length	141 mm	184 mm	227 mm	270 mm	313 mm	55 + (43 * number of modules)

* Specified dimensions don't concern configurations with UK power sockets nor the ones without multimedia ports / USB chargers. This kind of dimensions are available on request.

Put Magnet-Tube B on the edge of the table and fix it to the top using dedicated mounting brackets.

In case of the table top thickness bigger than 30mm, there's a possibility of using custom-made mounting brackets.
