

Mediaport mounted under the table top / desk. It's an economical solution dedicated to office workstations.

magnet-stick P is very efficient in situation where power strip should be hidden under the table top and easy access to power sockets and multimedia ports is needed. Cable routing in this version allows to avoid cutting additional mounting holes.

magnet-stick P is available in versions from 2 to 6 modules and in a few colour variants: anodized on black, natural or painted in white, red, yellow, green or blue colour.

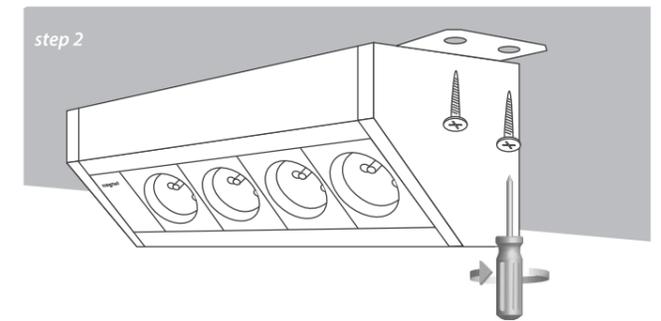

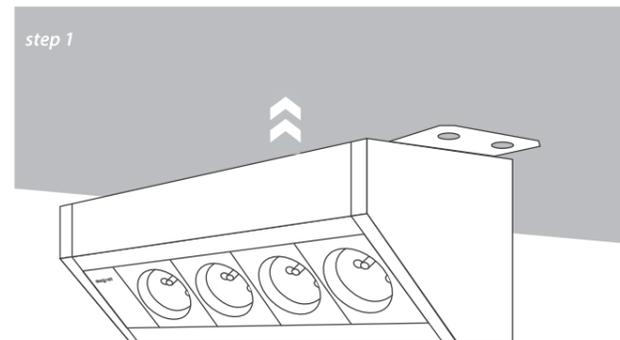

Dimensions of P version (length of housing)

version	2-module	3-module	4-module	5-module	6-module	7-module and more
length	147 mm	191 mm	234 mm	277 mm	320 mm	62 + (43 * number of modules)

* Specified dimensions don't concern configurations with UK power sockets nor the ones without multimedia ports / USB chargers. This kind of dimensions are available on request.

Place the housing under the table top in appropriate place.

Use wood screws to fix **magnet-stick P**

In case of the table top thickness bigger than 30mm, there's a possibility of using custom-made mounting brackets.
